December 22: Registration Onsite; Receive Conference Documents;

December 23: Opening Ceremony; Keynote Speech; Oral Session...

Note: Participate the conference or not will decide your own schedule, if you have no spare time, it'll not affect the paper publication and indexing.

Scenery in Shanghai:

As the largest and most prosperous city in the nation, Shanghai is the economic, financial and cultural center of China, while Beijing is the political heart. And this image of Shanghai as a fast and modern metropolis is certainly the one that most visitors take away. Those old preconceptions of Shanghai as the home of crime vice and prostitutes are wiped away, as the city successfully projects an image of itself as young, vibrant and cool.

Transportation in Shanghai-Shanghai Maglev Train:

The Shanghai maglev line runs 29.863 kilometers from Longyang Road Station on line 2 of Shanghai rail transit to Shanghai Pudong International Airport in the east. It is the world's first maglev service line jointly developed by China and Germany. It is the world's first commercial elevated maglev line. Shanghai maglev train is a kind of magnetic levitation train. The maglev train is designed on the principle of "opposites attract", which is a kind of suction suspension system, using the suspended electromagnet installed on the bogies on both sides of the train, and the magnet laid on the track.
